SUMMARY

Aspiring Computer Science Student with strong fundamentals in Data Structures and Algorithms, and core Computer Science principles. Experienced in applying problem-solving skills to real-world projects, collaborating in team environments, and adapting to new technologies. Skilled in C++ and Python, and eager to contribute to impactful and scalable solutions.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech.	Sardar Vallabhbhai National Institute of Technology, Surat	CGPA: 7.79	2027
Higher Secondary	P.P. Savani Vidhyalaya, Surat (GSEB)	79.00%	2023

SKILLS

- **Languages:** C++, Python, JavaScript , SQL
- **Web Technologies:** HTML, CSS, Express.js, Node.js, React.js , Next.js , Tailwind CSS , RESTful APIs
- **Databases:** MySQL, MongoDB , Supabase
- **Concepts:** Data Structures Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems
- **Tools:** Git, GitHub , Postman , n8n

PROJECTS

- **SecureVerify AI: Synthetic Identity Fraud Detection** [Demo](#)
Python, Streamlit, OpenCV, DeepFace, TensorFlow, Tesseract OCR, MongoDB
 - Developed an AI-driven e-KYC system to detect synthetic identity fraud by correlating document authenticity, facial biometrics, and behavioral signals using multi-modal data fusion.
 - Implemented document forgery detection using Error Level Analysis (ELA) and EfficientNet, achieving good accuracy in identifying AI-generated and tampered government IDs.
 - Engineered a biometric verification module with DeepFace embeddings and Laplacian-based liveness detection to prevent deepfake and spoofing attacks.
- **Scholarship Portal** [Demo](#)
Node.js, Express.js, React.js, Email.js, Tailwind CSS, MongoDB
 - Developed a MERN application featuring secure, token-based user authentication (JWT) with password hashing for robust user registration and login functionality.
 - Designed a dynamic, responsive UI with a multi-filter system for searching and sorting scholarships by category, state, education level, and more.
 - Developed a Dashboard section for students to manage and monitor activities efficiently.
- **ReelFeed: A Video-First Food Discovery Platform** [Demo](#)
React, Node.js, Express.js, MongoDB, Tailwind CSS
 - Developed a full-stack MERN application inspired by Zomato, featuring a dual-portal system for both customers and restaurant partners to modernize food discovery.
 - Engineered a dual-interface system with a TikTok-style video feed for customer discovery and a secure portal for partners to upload content and manage their restaurant profiles.

POSITIONS OF RESPONSIBILITY

- **Co-Head, Technical Committee, MINDBEND** *Event Organizer / Nov 2024 - April 2025*
 - Designed Multi Round coding challenge named Codecraft in MINDBEND 2024 to evaluate coding skills and problem-solving abilities of all participants.
 - Managed team shortlisting, final round execution, and prize distribution, demonstrating leadership, resource management, and time management skills.
- **Student Coordinator, BIS Student Chapter, CSE Department** *Event Organizer / Sep 2025 - present*

ACHIEVEMENTS & CERTIFICATIONS

- **ACM Summer Challenge:** Successfully completed a 30-day coding challenge focused on advanced algorithms and data structures. Implemented optimized solutions, improved problem-solving efficiency, and earned a [Certificate](#).
- **Echelon Hackathon:** Participated in a competitive hackathon and built an AI-driven e-KYC system for Synthetic Identity Fraud Detection using multi-modal data fusion (Document, Biometric, Behavioral). Earned a [Certificate](#).

PROFILES AND LINKS

- **LeetCode:** Solved **500+** Problems, Rating: **1524** | [in](#) [kunjaghani](#)
- **Codeforces:** Solved **260+** Problems, Max Rating: **1231** | [trophy](#) [VK66](#)
- **CodeChef:** 2Star Coder, Max rating: **1508** | [keyboard](#) [kunj_vaghani](#)
- **GeeksforGeeks:** Solved **150+** Problems | [code](#) [kunjagh5z1t](#)
